

**CEO Pina Hirano to Speak at Next-Gen Financial Conference
“MoneyX 2026” - Joining CEO Noritaka Okabe in a Session
on the Frontlines of Stablecoin Adoption, and
“JPYC Gateway” Product Demo to Debut at the Asteria Booth**
February 27, 2026 (Friday) 10AM-6PM @ The Prince Park Tower Tokyo

Tokyo – February 18, 2026 -- Asteria Corporation (Head Office: Tokyo, Japan; CEO HIRANO (Pina) Yoichiro; Tokyo Stock Exchange listed, Security Code: 3853, hereinafter “Asteria”) is pleased to announce that CEO Pina Hirano will present at “MoneyX 2026” (hosted by the WebX Executive Committee) on February 27, 2026 at the Prince Park Tower Tokyo. A debut demonstration of the new service “JPYC Gateway” will also be held at the Asteria booth on the same day.

■ Objectives for “MoneyX 2026” Participation

With the amended Payment Services Act now in effect, regulatory frameworks for stablecoins and tokenized deposits are being developed. As a result, stablecoins are transitioning from the conceptual and proof-of-concept stages to an implementation phase in which they are being incorporated into actual business operations. In this evolving landscape, “MoneyX 2026” is a next-generation financial conference where key innovation leaders will discuss how new forms of currency are being integrated into society and corporate activity.

Asteria has long been dedicated to advancing awareness and adoption of stablecoin technology and has participated in stablecoin-related social experiments with the Blockchain Collaborative Consortium (BCCC) since 2017. In November 2025, Asteria introduced JPYC support via the no-code app development platform “Click”, followed by the December 2025 announcement of “JPYC Gateway”, a solution designed to promote and facilitate corporate adoption.

We have decided to participate as the Title (top-tier) Sponsor of “MoneyX 2026” with the aim of advancing stablecoins that are transforming the financial system and contributing to the development of next-generation financial infrastructure and the strengthening of Japan’s global competitiveness. Through this conference, Asteria will share practical insights on integrating enterprise systems with stablecoins and explore the potential for broader societal transformation.

On the day, a product demo of “JPYC Gateway” will be held in the exhibition area. At the talk session, CEO Pina Hirano will join Noritaka Okabe (JPYC inc. CEO) to discuss the future of currency, with a focus on how stablecoins are transforming the financial system.

■ About Asteria Corporation (<https://en.asteria.com/>)

Asteria is a software development company that provides products and services that “connect” systems, people, things and intentions based on the concept of “Connecting the World with Software”. Its flagship product, “ASTERIA Warp” is middleware which integrates data from different systems and cloud services without coding and has been adopted by over 10,000 companies. Other products include digital storage app “Handbook X”, mobile app builder “Platio” and no-code AI/IoT platform “Gravio”. By offering these products, Asteria promotes digital transformation (DX) and helps organizations improve their business process efficiency. Asteria is also engaged in raising awareness of new technologies and their value and fosters innovation through its involvement in the launch of Blockchain Collaborative Consortium and No Code Promotion Association.
