

Bakusoku.AI, an All-in-One Platform for AI-Powered Business Apps, Launches August 1

Rapidly Build AI-Powered Business Apps of Any Scale by Conversing with AI—in as Little as 3 Minutes
Also in the Lineup: Platío Canvas AI, an Enterprise-Grade Solution with Built-In MCP Integration

Tokyo – June 23, 2026 -- Asteria Corporation (Head Office: Tokyo, Japan; CEO HIRANO (Pina) Yoichiro; Tokyo Stock Exchange listed, Security Code: 3853, hereinafter “Asteria”) and Asteria Canvas Inc. (Head Office: Tokyo, Japan; CEO KUDO Ryota, hereinafter “Asteria Canvas”) are pleased to announce “Bakusoku.AI”, an AI-native business platform that enables the development of business software in as little as 3 minutes, and provides autonomous support for ongoing operation, improvement and maintenance. Bakusoku.AI will be available starting August 1, 2026, with a trial campaign launching today. “Platío Canvas AI”, the enterprise edition of Bakusoku.AI, is scheduled for release in late August.

■ Background

With the growing popularity of tools such as Claude Code (Anthropic), Codex (OpenAI), Gemini Code Assist (Google), the use of AI in computer software development is accelerating worldwide. However, developing business software that can be deployed seamlessly in day to day business operations has been challenging, as AI development requires sophisticated prompt engineering and a production-ready environment.

Leveraging the Asteria Group’s extensive experience with no-code technologies such as Platío and Click, Bakusoku.AI was developed as an AI-native business platform that enables anyone to create business software for on-site use, while also providing MCP (Model Context Protocol) integrations that can be accessed from a wide range of AI systems. By simply interacting with Bakusoku.AI through natural language conversations, frontline staff can develop practical business software, while the AI continues to provide support for operation, improvement, and maintenance after development.

Sales management system creation interface

■ Product Overview

An overview of the AI-native business platforms Bakusoku.AI and Platío Canvas AI is provided below.

Product	Release Date / URL	Overview
Bakusoku.AI 	August 1, 2026 https://lp.bakusoku.ai/	- An AI platform that automatically generates software UIs and business logic from chat-based inputs - AI performs not only development but also ongoing improvement support after deployment - Enables rapid system modifications to adapt to changing business environments, reducing reliance on individual expertise and accelerating business process improvement
Platío Canvas AI 	Late August 2026 https://platío-ai.com/canvas-ai/	- Enterprise edition for more advanced cases - In addition to standard Bakusoku.AI features, it includes advanced security, governance, MCP/API integration and dedicated support - Connects to ASTERIA Warp – No.1 in data integration market share for 19 consecutive years - Enables seamless integration with internal systems and cloud services

- Develop software in as little as 3 minutes by simply describing the required software in a conversational format.
- Automatically provides the cloud environment required for production, enabling a seamless process from development to deployment.
- Supports AI-based business orchestration (automated integration and control) by converting the generated software into MCP.
- AI support for application development, operations, improvement, and maintenance.

Plan	Free	Standard	Pro*1	Premium	Enterprise*2
Price in JPY (before tax)	0	9,000/month	27,000/month	Annual 100,000/month Monthly 110,000/month	Annual 200,000/month Monthly 220,000/month
AI credit	1,200 (initial only)	36,000/year	144,000/year	Annual 720,000/year Monthly 60,000/month	Annual 1,440,000/year Monthly 120,000/month
Database size	10MB	1GB	20GB	100GB	200GB
No. of users	1	1	1	5	10
Email notifications	-	100/month	2,000/month	10,000/month	20,000/month
External integration	-	-	MCP	MCP (standard feature) API 20,000 JPY/month	
Security	-	-	Custom domain	IP restriction, SSO, SAML, custom domain	
Support	-	Community		Dedicated	
Sales method	Direct sales			Partner sales	

*1: Additional AI credits can be purchased for Bakusoku.AI Pro

*2: Additional AI credits, database capacity, users and email notifications can be purchased for Platio Canvas AI Enterprise

■Bakusoku.AI Trial Campaign

Product	Bakusoku.AI Pro Plan
Period	June 23, 2026 to July 31, 2026
Eligibility	Corporate use
Register	https://lp.bakusoku.ai/
Note	Data migration to the full version available from August 1

■Platio Canvas AI Trial Campaign

Product	Platio Canvas AI Premium Plan
Early Registration Period	June 23, 2026 to July 31, 2026 (Trial expected to start late June)
Eligibility	Corporate use
Register	https://platio-ai.com/canvas-ai/
Bonus	Early access sign-ups receive 24,000 AI credits (double the standard trial)

■Future Plans

The Asteria Group aims to accelerate its clients' transformation into AI-native organizations by advancing AI development as the next evolution of no-code technology. Over the next 3 years, Bakusoku.AI and Platio Canvas AI are targeting 500 million yen in combined revenue.

■About Asteria Corporation (<https://en.asteria.com/>)

Asteria is a software development company that provides products and services that “connect” systems, people, things and intentions based on the concept of “Connecting the World with Software”. Its flagship product, “ASTERIA Warp” is middleware which integrates data from different systems and cloud services without coding and has been adopted by over 10,000 companies. Other products include digital content management app Handbook X”, mobile app builder “Platio” and no-code AI/IoT platform “Gravio”. By offering these products, Asteria promotes digital transformation (DX) and helps organizations improve their business process efficiency. In 2019, it founded Asteria ART (CEO: Tomoya Sonoda), an AI-focused subsidiary dedicated to researching practical applications of artificial intelligence. Asteria is also engaged in raising awareness of new technologies and their value and fosters innovation through its involvement in the launch of Blockchain Collaborative Consortium and No Code Promotion Association.
